JUKI DDL-9000B Automatic Single Needle Lockstitch Industrial Sewing Machine

Â

*****Juki has discontinued the DDL-9000B*****

Â

Now, JUKI has launched an advanced 1-needle lockstitch machine with unrivalled performance, a successor to the DDL-9000/-9000A. This is the newest flagship lockstitch machine from JUKI, a manufacturer which aims for genuine quality every minute of the day.

Â

Max. sewing speed: 5,000sti/min The sewing speed of 5000sti/min, which is the highest speed of any direct-drive lockstitch machines, contributes to increased productivity.

The DDL-9000B-S is the standard model developed with the emphasis on durability. It produces seams with consistency when run at speeds which falls in the range of the highest sewing speeds.

- Single Needle Lockstitch Sewing Machine
- Automatic Thread Trimming
- Semi Lubricating Full Rotary Hook

- High Presser Foot
- Push Type Reverse Switch
- Horizontal Thread Trimming System
- Maximum 4.5mm Stitch Length
- Easy Access Maintenance Capabilities
- Uses Organ DBx1 Needles same as 16x231
- MS “ Semi-dry head type for Medium-Weight application
- WB “ Wiper Provided
- AK141 “ Auto Lifter Provided
- S “ Single Phase 100-120V

Â

The Juki DDL-9000B Series is the premier 1-needle lockstitch machine with respect to functions, performance and design. This 1-needle lockstitch machine is JUKI's highly advanced model provided with a thread trimmer which operates at the highest speed of its kind, a mechanism which promises silent operation and advanced power saving features. This cutting-edge machine is a successor model of the DDL-9000 and DDL-9000A.

All of the three DDL-9000B series machine head types are friendly to the environment since they prevent oil stains and minimize the quantity of stain remover used. Select one of the three machine heads according to your sewing applications.

Â

The DDL-9000B has adopted the latest compact-size servomotor as its driving source. This latest compact-size servomotor is an energy-saving, highly efficient motor which is able to run under a high torque and has a broader range of speed. In addition, the servomotor is installed with a direct-drive system to transmit the motor power directly to the sewing machine, thereby achieving improved power-consumption saving, quicker response, quicker startup, increased accuracy of the stop position and stronger material penetrating force of the needle.

The newly-developed model totally eliminates "bird's nests at the starting of sewing", which have been a conventionally inevitable factor when using machines with a thread trimmer. The length of thread remaining at the end of sewing is shortened. With these two capabilities, the machine demonstrates its improved performance in the sewing of parts in which the starting and end points of a seam are visible, such as in the case of sewing name labels, topstitching and counterstitching collar bottoms.

Â

This machine ships complete including table top, stand and drive unit - fully assembled!

Call Sunny Sewing at 214-749-7991 or 1-800-228-0001 for pricing and delivery.

Â

Model name	DDL-9000BSS	DDL-9000BSH
Application	Medium-weight	Heavy-weight
Lubrication	Minute-quantity lubrication	
Max. sewing speed	5,000sti/min	4,500sti/min
Max. stitch length	5mm*	
Needle	DBÃ—1 (#11) #9-#18	DBÃ—1 (#21) #20-#23
Lift of the presser foot	By hand: 5.5mm, By knee: 15mm, Auto: 8.5mm	

Machine comes standard with CP-18 control panel. **CP-180** is available. You may select the **CP-180** option below
